Celebrating a Decade of Industry-Defining Innovation, Public-Private Collaboration and Leadership

12 – 14 November 2025, Singapore

A bold step by the Monetary Authority of Singapore (MAS) led to a global movement that has defined the rise of FinTech.

The Singapore FinTech Festival (SFF) is the **world's largest and most influential global gathering of the policy, finance, and technology ecosystem**, convening over **65,000 attendees from more than 130 countries**. Taking place in Singapore on its 60th year of independence, this year marks a significant milestone: the 10th edition of the Festival.

For the last decade, SFF is where policymakers and regulators, innovators, decision-makers, and future-builders have come together to address critical challenges and forge pathways to future growth.

This year's festival is set to be the biggest and most impactful yet – a celebration of industry achievements and a clear roadmap for the decade ahead.

Organised by

In collaboration with

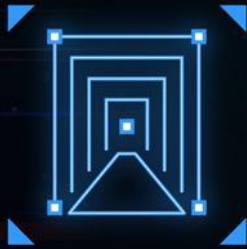

The 2025 Festival Theme

Shaping the Next Decade of **Growth**

Celebrating a Decade of Progress

We mark a decade of innovation driven by public-private collaboration. We celebrate the resilience of a community that advanced Open Banking, embedded finance, API-driven architectures, and cross-border digital asset pilots to broaden access, strengthen financial systems, and unlock new opportunities for impactful innovation.

Building Pathways for Growth

The next decade will be shaped by AI, Tokenization, and Quantum Computing. We will unpack how their secure, interoperable, and inclusive deployment will drive new liquidity, build a more connected global economy, and unlock new growth corridors.

Addressing Unresolved Challenges

Despite progress, critical challenges remain - the USD 5.2 trillion SME finance gap, 1.4 billion unbanked, and ageing populations. SFF will address issues like transparency, data privacy, cybercrime, and sustainability, framing opportunities for collaboration that will foster more resilient, inclusive, and secure financial ecosystems.

“

I most look forward to seeing the world of FinTech, from companies, investors, technologists, regulators and policymakers, in Singapore, as well as touring the showroom floor, which is like peering into the future of money and banking, as participants demonstrate their latest market developments. One tour of the Singapore FinTech Festival showroom floor (...) is like a world tour visiting the leading FinTech companies.
